

# **Expedited keg** collections and return logistics

# Kegspediter, the Hillebrand keg return process

### **Collections**

- · Optimize collections across U.S. wholesaler network
- · Maximize frequency by pick-up of all participating brands
- · Provide real-time tracking and tracing
- · Balance single and multi-stops for velocity and cost optimization
- · Leverage extensive network of multi-modal carriers

# Collections Produces- Distributor-Brewery production & management

Hillebrand supply chain planning

· Optimize forecasting algorithms

· Inventory and shipment reporting

· Asset management and analysis

· Deposit credit management

· Export consolidations · Export keg returns

· Demand planning integration

· Distributor management

· Manage expected SKUs

· Schedule collection

### Consolidation National warehouse network

## Inbound kegs

- · Verify asset counts
- · Correct BOLs
- · Deconsolidate keas
- · Separate strays
- · Provide distributor notification
- · Provide brewery credit notification

### Outbound kegs

- · Return loading
- · Custom loading configurations
- · Optimize container yield (for export)
- · Return count verification
- · Prepare BOL and documentation

### Return to brewery

- · Return empties to brewery
- · Manage multiple modes for velocity and cost balancing
- · Palletize assets for scanning
- · Execute production preparation of kegs and pallets
